

Career Keys has nearly 10 years experience in training in the education sector and during this time has developed a solid reputation as a quality RTO.

How did we achieve this?

By offering quality!

- Career Keys trains **quality** support staff. Every year over 250 students successfully complete the Certificate III in Education Support (Teachers Aide) qualification. Flexible training options are available including face to face, RPL & correspondence.
- Career Keys offer you our best **quality** graduates. Over 120 satisfied schools throughout South East Queensland employ our graduates. These schools understand the benefit of 'training to their standards' while students complete a 20 week (unpaid) industry placement.
- Career Keys facilitates **quality** professional development for your support staff. Regular workshops are offered that target knowledge gap areas and are facilitated by experienced educators who understand the education sector and accompanying challenges.
- Career Keys also deliver **quality** programs that can be tailored to meet your specific student needs. Examples include: addressing low self esteem, bullying, poor social skills, anger management, relationships etc
- Career Keys offers you a **quality** career education program - and how to deliver it. This whole school approach teaches a process of planning and managing future career directions and pathways, and is mapped to the Australian Blueprint for Career Development.
